

Common Facility Centres (CFCs) available for ODOP products

Common Facility Centres (CFCs)

This section outlines the Common Facility Centers (CFCs) available for ODOP products. These facilities are strategically set up to support producers and entrepreneurs involved in the production of ODOP products by offering access to shared resources and infrastructure. The CFCs are equipped with state-of-the-art tools, machinery, and technology, which enables small and medium enterprises (SMEs) to improve their production processes, product quality, and overall operational efficiency without the heavy investment in individual facilities.
